Backend 3.4_CW Exercises

ex01: send a request

- Locate the request for which you want to save the response.
- Click on the request to open its details.

ex02: view response

- After you've opened the request details, click on the "Send" button located on the right side of the request details.
- Postman will send the request to the designated API endpoint.

ex03: save response

- Once the response is received, it will be displayed in the "Response" section below the request details.
- To save the response:

  - Click on the "Save Response" button located at the upper-right corner of the response panel (next to the response headers).
  - A dropdown menu will appear with options to save the response.

Save 🗑
